

Product datasheet for MR206563L3

B4gat1 (NM_175383) Mouse Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: B4gat1 (NM_175383) Mouse Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: B4gat1

Synonyms: 1500032M01Rik; B3gnt1; B3gnt6; BETA3GNT1; iGAT; iGNT

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR206563).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

 $[\]ensuremath{^*}$ The last codon before the Stop codon of the ORF.

ACCN: NM_175383

ORF Size: 1245 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

B4gat1 (NM_175383) Mouse Tagged Lenti ORF Clone - MR206563L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

RefSeq: <u>NM 175383.2</u>, <u>NP 780592.1</u>

 RefSeq Size:
 2035 bp

 RefSeq ORF:
 1248 bp

 Locus ID:
 108902

 UniProt ID:
 Q8BWP8

Cytogenetics: 19 A

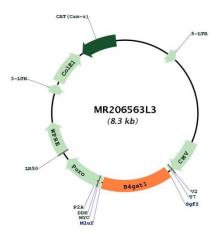

Gene Summary: Beta-1,4-glucuronyltransferase involved in O-mannosylation of alpha-dystroglycan (DAG1).

Transfers a glucuronic acid (GlcA) residue onto a xylose (Xyl) acceptor to produce the glucuronyl-beta-1,4-xylose-beta disaccharide primer, which is further elongated by LARGE1, during synthesis of phosphorylated O-mannosyl glycan. Phosphorylated O-mannosyl glycan is a carbohydrate is a carbohydrate structure present in alpha-dystroglycan (DAG1), which is required for binding laminin G-like domain-containing extracellular proteins with high affinity (PubMed:25279699). Required for axon guidance; via its function in O-mannosylation of

alpha-dystroglycan (DAG1) (PubMed:23217742).[UniProtKB/Swiss-Prot Function]
