

Product datasheet for MR207627L2

Dmrt3 (NM_177360) Mouse Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| Product Type: | Expression Plasmids |
|------------------------------|------------------------------------------------------------------------------------------------------------------------|
| | |
| Product Name: | Dmrt3 (NM_177360) Mouse Tagged Lenti ORF Clone |
| Tag: | mGFP |
| Symbol: | Dmrt3 |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-mGFP (PS100071) |
| E. coli Selection: | Chloramphenicol (34 ug/mL) |
| ORF Nucleotide | The ORF insert of this clone is exactly the same as(MR207627). |
| Sequence: | |
| Restriction Sites: | Sgfl-Mlul |
| Cloning Scheme: | |
| - | Cloning sites used for ORF Shuttling: |
| | Sgfi ORF Miui |
| | GCG ATC GCC <mark>ATG // NNŇ</mark> ACG CGT |
| | |
| | |
| | Kozak Consensus |
| | EcoR I BamH I RBS Sgf I ORF CTATAGGGCGGCCGGGAATTCGTCGCACCGAGGAGATCTGCCGCCGCCGCGGCACCGC C ATG |
| | Mlu I Not I Xho I mGFP Tag |

- G L R Stop

* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM_177360 1431 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| ORIGENE Dmrt3 (NM_177360) Mouse Tagged Lenti ORF Clone – MR207627L2 | |
|----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OTI Disclaimer: | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery. |
| | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Meth | od: 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>NM 177360.2, NP 796334.2</u> |
| RefSeq Size: | 2401 bp |
| RefSeq ORF: | 1431 bp |
| Locus ID: | 240590 |
| UniProt ID: | <u>Q80WT2</u> |
| Cytogenetics: | 19 B |
| Gene Summary: | Probable transcription factor that plays a role in configuring the spinal circuits controlling stride in vertebrates. Involved in neuronal specification within specific subdivision of spinal cord neurons and in the development of a coordinated locomotor network controlling limb movements. May regulate transcription during sexual development.[UniProtKB/Swiss-Prot Function] |
