

Product datasheet for MR207700L4V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Casp8 (NM 001080126) Mouse Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Casp8 (NM_001080126) Mouse Tagged ORF Clone Lentiviral Particle

Symbol:

Casp; CASP-8; FLI; FLICE; MAC; MACH; Mch5 Synonyms:

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

mGFP Tag:

NM 001080126 ACCN:

ORF Size: 1443 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(MR207700).

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional

amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA.

Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence

verification at a reduced cost. Please contact our customer care team at

custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

NM 001080126.1, NP 001073595.1 RefSeq:

RefSeq Size: 2412 bp RefSeq ORF: 1443 bp

Casp8 (NM_001080126) Mouse Tagged ORF Clone Lentiviral Particle - MR207700L4V

Locus ID: 12370

 UniProt ID:
 089110

 Cytogenetics:
 1 29.19 cM

Gene Summary: This gene is part of a family of caspases, aspartate-specific cysteine proteases well studied for

their involvement in immune and apoptosis signaling. This protein, an initiator of apoptotic cell death, is activated by death-inducing tumor necrosis family receptors and targets downstream effectors. In mouse deficiency of this gene can cause embryonic lethality. This protein may have a role in embryogenesis. Alternative splicing results in multiple transcript

variants that encode different protein isoforms. [provided by RefSeq, Apr 2013]
