Gene Summary:Rho GTPase-activating protein involved in the signal transduction pathway that regulates
endothelial cell capillary tube formation during angiogenesis. Acts as a GTPase activator for
the RAC1 by converting it to an inactive GDP-bound state. Inhibits RAC1-dependent
lamellipodia formation. May also play a role in transcription regulation via its interaction with
VEZF1, by regulating activity of the endothelin-1 (EDN1) promoter.[UniProtKB/Swiss-Prot
