

Product datasheet for MR208274L4V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Ate1 (NM_013799) Mouse Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Ate1 (NM_013799) Mouse Tagged ORF Clone Lentiviral Particle

Symbol: Ate

Synonyms: Al225793; AW547406

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

ACCN: NM_013799 **ORF Size:** 1551 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(MR208274).

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional

amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA.

Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence

verification at a reduced cost. Please contact our customer care team at

<u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 013799.2, NP 038827.2

RefSeq Size: 4768 bp RefSeq ORF: 1551 bp

Ate1 (NM_013799) Mouse Tagged ORF Clone Lentiviral Particle - MR208274L4V

Locus ID: 11907

UniProt ID: Q9Z2A5

Cytogenetics: 7 F3

Gene Summary: Involved in the post-translational conjugation of arginine to the N-terminal aspartate or

glutamate of a protein. This arginylation is required for degradation of the protein via the ubiquitin pathway. Does not arginylate cysteine residues.[UniProtKB/Swiss-Prot Function]
