# Product datasheet for MR208310L3V

## Abcd4 (BC050102) Mouse Tagged ORF Clone Lentiviral Particle

### Product data:

Product Type:	Lentiviral Particles
Product Name:	Abcd4 (BC050102) Mouse Tagged ORF Clone Lentiviral Particle
Symbol:	Abcd4
Synonyms:	P69r, P70R
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	BC050102
ORF Size:	1557 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(MR208310).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>BC050102, AAH50102</u>
RefSeq Size:	2410 bp
RefSeq ORF:	1559 bp
Locus ID:	19300
Cytogenetics:	12 39.3 cM

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Sour Content State Abcd4 (BC050102) Mouse Tagged ORF Clone Lentiviral Particle – MR208310L3V

Gene Summary:The membrane-associated protein encoded by this gene is a member of the superfamily of<br/>ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across<br/>extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies<br/>(ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the ALD<br/>subfamily, which is involved in peroxisomal import of fatty acids and/or fatty acyl-CoAs in the<br/>organelle. All known peroxisomal ABC transporters are half transporters which require a<br/>partner half transporter molecule to form a functional homodimeric or heterodimeric<br/>transporter. The function of this peroxisomal membrane protein is unknown. However, it is<br/>speculated that the human protein may function as a heterodimer for another peroxisomal<br/>ABC transporter and, therefore, may modify the adrenoleukodystrophy phenotype. It may<br/>also play a role in the process of peroxisome biogenesis. [provided by RefSeq, Jul 2008]
