# Product datasheet for MR209360L3V

## Ankrd25 (BC010245) Mouse Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	Ankrd25 (BC010245) Mouse Tagged ORF Clone Lentiviral Particle
Symbol:	Ankrd25
Synonyms:	MGC12143, MGC7734
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	BC010245
ORF Size:	1821 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(MR209360).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This
	clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	
OTI Annotation: RefSeq:	variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression
	variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. <u>BC010245.1</u>
RefSeq: RefSeq Size:	variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. <u>BC010245.1</u> 3427 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### Ankrd25 (BC010245) Mouse Tagged ORF Clone Lentiviral Particle – MR209360L3V

Gene Summary:Involved in transcription regulation by sequestering in the cytoplasm nuclear receptor<br/>coactivators such as NCOA1, NCOA2 and NCOA3 (By similarity). Involved in regulation of<br/>caspase-independent apoptosis by sequestering the proapoptotic factor AIFM1 in<br/>mitochondria (By similarity). Pro-apoptotic stimuli can induce its proteasomal degradation<br/>allowing the translocation of AIFM1 to the nucleus to induce apoptosis (By similarity). Involved<br/>in the negative control of vitamin D receptor signaling pathway (By similarity). Involved in<br/>actin stress fibers formation through its interaction with ARHGDIA and the regulation of the<br/>Rho signaling pathway (PubMed:25961457). May thereby play a role in cell adhesion and<br/>migration, regulating for instance podocytes migration during development of the kidney<br/>(PubMed:25961457). Through the Rho signaling pathway may also regulate cell proliferation<br/>(PubMed:16024821).[UniProtKB/Swiss-Prot Function]
