

## Product datasheet for MR209469L4

### Glce (NM\_033320) Mouse Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Glce (NM\_033320) Mouse Tagged Lenti ORF Clone

Tag: mGFP Symbol: Glce

**Synonyms:** 1110017N23Rik; Al747411; C130034A12Rik; Hsepi

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

Sgfl-Mlul

**E. coli Selection:** Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR209469).

Sequence:

ence:

Restriction Sites: Cloning Scheme:

Sgf 1 ORF Mlu 1

GCG ATC GC ATG ---//-- NNN ACG CGT ---

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** NM\_033320

ORF Size: 1857 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

### Glce (NM\_033320) Mouse Tagged Lenti ORF Clone - MR209469L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 033320.4</u>

RefSeq Size: 4626 bp
RefSeq ORF: 1857 bp
Locus ID: 93683
UniProt ID: Q9EPS3

**Cytogenetics:** 9 B

Gene Summary: Converts D-glucuronic acid residues adjacent to N-sulfate sugar residues to L-iduronic acid

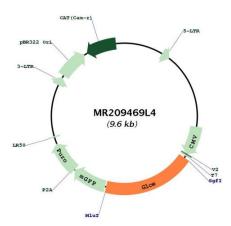

residues, both in maturing heparan sulfate (HS) and heparin chains. This is important for

further modifications that determine the specificity of interactions between these

glycosaminoglycans and proteins.[UniProtKB/Swiss-Prot Function]
