

# Product datasheet for MR209696L4V

# Abr (BC059064) Mouse Tagged ORF Clone Lentiviral Particle

## **Product data:**

#### **Product Type: Lentiviral Particles Product Name:** Abr (BC059064) Mouse Tagged ORF Clone Lentiviral Particle Symbol: Abr Mammalian Cell Puromycin Selection: Vector: pLenti-C-mGFP-P2A-Puro (PS100093) mGFP Tag: ACCN: BC059064 **ORF** Size: 1923 bp The ORF insert of this clone is exactly the same as(MR209696). **ORF** Nucleotide Sequence: **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info This clone was engineered to express the complete ORF with an expression tag. Expression **OTI** Annotation: varies depending on the nature of the gene. **RefSeq:** BC059064, AAH59064 **RefSeq Size:** 4455 bp **RefSeq ORF:** 1925 bp Locus ID: 109934 11 45.92 cM Cytogenetics:

### Source Abr (BC059064) Mouse Tagged ORF Clone Lentiviral Particle – MR209696L4V

Gene Summary:Protein with a unique structure having two opposing regulatory activities toward small GTP-<br/>binding proteins. The C-terminus is a GTPase-activating protein domain which stimulates GTP<br/>hydrolysis by RAC1, RAC2 and CDC42. Accelerates the intrinsic rate of GTP hydrolysis of RAC1<br/>or CDC42, leading to down-regulation of the active GTP-bound form. The central Dbl<br/>homology (DH) domain functions as guanine nucleotide exchange factor (GEF) that<br/>modulates the GTPases CDC42, RHOA and RAC1. Promotes the conversion of CDC42, RHOA<br/>and RAC1 from the GDP-bound to the GTP-bound form (By similarity). Functions as an<br/>important negative regulator of neuronal RAC1 activity (PubMed:20962234). Regulates<br/>macrophage functions such as CSF-1 directed motility and phagocytosis through the<br/>modulation of RAC1 activity (PubMed:17116687).[UniProtKB/Swiss-Prot Function]
