

# Product datasheet for MR209795L3

# Smpd3 (NM\_021491) Mouse Tagged Lenti ORF Clone

### **Product data:**

Tag:

Symbol:

Synonyms:

Selection: Vector:

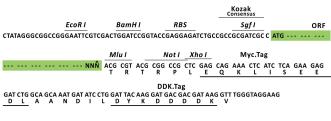

# **Product Type: Expression Plasmids Product Name:** Smpd3 (NM\_021491) Mouse Tagged Lenti ORF Clone Myc-DDK Smpd3 4631433G07Rik; AI427456; AW537966; fro; nSMase2 **Mammalian Cell** Puromycin pLenti-C-Myc-DDK-P2A-Puro (PS100092) E. coli Selection: Chloramphenicol (34 ug/mL)

The ORF insert of this clone is exactly the same as(MR209795). **ORF** Nucleotide

Sequence: **Restriction Sites:** 

**Cloning Scheme:** 

\* The last codon before the Stop codon of the ORF.

ACCN: **ORF Size:**  NM\_021491 1965 bp

Sgfl-Mlul

<b>GRIGENE</b> Smpd3	(NM_021491) Mouse Tagged Lenti ORF Clone – MR209795L3
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 021491.3</u>
RefSeq Size:	5148 bp
RefSeq ORF:	1968 bp
Locus ID:	58994
UniProt ID:	<u>Q9JJY3</u>
Cytogenetics:	8 D3
Gene Summary:	Catalyzes the hydrolysis of sphingomyelin to form ceramide and phosphocholine. Ceramide mediates numerous cellular functions, such as apoptosis and growth arrest, and is capable of regulating these 2 cellular events independently. Also hydrolyzes sphingosylphosphocholine. Regulates the cell cycle by acting as a growth suppressor in confluent cells. Acts as a regulator of postnatal development and participates in bone and dentin mineralization. Overexpression enhances cell death, suggesting that it may be involved in apoptosis control. [UniProtKB/Swiss-Prot Function]
