| Product Type:                | Expression Plasmids  |
|------------------------------|--|
| 21                           | •  |
| Product Name:                | Epha5 (BC057401) Mouse Tagged Lenti ORF Clone                                    |
| Tag:                         | Myc-DDK  |
| Symbol:                      | Epha5  |
| Synonyms:                    | Ehk1, Hek7, Rek7   |
| Mammalian Cell<br>Selection: | Puromycin  |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)   |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(MR210806).                   |
| <b>Restriction Sites:</b>    | Sgfl-Mlul  |
| Cloning Scheme:              |  |
|                              | Cloning sites used for ORF Shuttling:  |
|                              | Sgf I         ORF         Mlu I            GCG ATC GC         ATG // NNÑ ACG CGT |

ACCN: ORF Size:

BC057401 2457 bp

| CRIGENE Epha5 (BC057401) Mouse Tagged Lenti ORF Clone – MR210806L3 |  |
|--|--|
| OTI Disclaimer:  | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:  | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:  | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method:   | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>   |
| RefSeq:  | <u>BC057401.1</u>  |
| RefSeq Size:   | 4018 bp  |
| RefSeq ORF:  | 2459 bp  |
| Locus ID:  | 13839  |
| Cytogenetics:  | 5 43.0 cM  |
| Gene Summary:  | Receptor tyrosine kinase which binds promiscuously GPI-anchored ephrin-A family ligands<br>residing on adjacent cells, leading to contact-dependent bidirectional signaling into<br>neighboring cells. The signaling pathway downstream of the receptor is referred to as<br>forward signaling while the signaling pathway downstream of the ephrin ligand is referred to<br>as reverse signaling. Among GPI-anchored ephrin-A ligands, EFNA5 most probably constitutes<br>the cognate/functional ligand for EPHA5. Functions as an axon guidance molecule during<br>development and may be involved in the development of the retinotectal, entorhino-<br>hippocampal and hippocamposeptal pathways. Together with EFNA5 plays also a role in<br>synaptic plasticity in adult brain through regulation of synaptogenesis. In addition to its<br>function in the nervous system, the interaction of EPHA5 with EFNA5 mediates<br>communication between pancreatic islet cells to regulate glucose-stimulated insulin secretion.<br>[UniProtKB/Swiss-Prot Function] |
