

Product datasheet for MR211381L4

Usp15 (NM_027604) Mouse Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Usp15 (NM_027604) Mouse Tagged Lenti ORF Clone

Tag: mGFP Symbol: Usp15

Synonyms: 4921514G19Rik; Al327321; E430033l05Rik; Gcap; Gcap18

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR211381).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_027604

ORF Size: 2946 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Usp15 (NM_027604) Mouse Tagged Lenti ORF Clone - MR211381L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 027604.3</u>, <u>NP 081880.2</u>

RefSeq Size: 11564 bp
RefSeq ORF: 2946 bp
Locus ID: 14479
UniProt ID: Q8R5H1
Cytogenetics: 10 D2

Gene Summary: The protein encoded by this gene is a member of the large ubiquitin specific protease (Usp)

family of proteins. These proteins are known to cleave ubiquitin, and contain a conserved cysteine residue (Cys box) and two conserved histidine residues (His box) that are thought to form part of the active site of the protease. This protein has been shown to cleave both the ubiquitin-proline and the ubiquitin-methionine bonds in vitro. This protein is thought to regulate many cellular processes through its deubiquitination activity, including the

transforming growth factor beta (TGF-beta) pathway. Cardiac-specific overexpression of the

human ortholog of this gene in mice causes enlargement of the heart that is more pronounced in the atrium than in the ventricle. This gene has two pseudogenes on chromosome 14. Alternative splicing results in multiple transcript variants that encode

multiple protein isoforms.[provided by RefSeq, Aug 2014]
