

## **Product datasheet for MR211700L4**

## Inoc1 (BC061495) Mouse Tagged Lenti ORF Clone

## **Product data:**

**Product Type:** Expression Plasmids

Product Name: Inoc1 (BC061495) Mouse Tagged Lenti ORF Clone

Tag:mGFPSymbol:Inoc1Synonyms:Ino80

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

**ORF Nucleotide** The ORF insert of this clone is exactly the same as(MR211700).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** BC061495 **ORF Size:** 3423 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

## Inoc1 (BC061495) Mouse Tagged Lenti ORF Clone - MR211700L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>BC061495</u>

RefSeq Size: 4385 bp

RefSeq ORF: 3425 bp

**Locus ID:** 68142

Cytogenetics: 2 E5

**Gene Summary:** ATPase component of the chromatin remodeling INO80 complex which is involved in

transcriptional regulation, DNA replication and DNA repair. Binds DNA. As part of the INO80

complex, remodels chromatin by shifting nucleosomes. Regulates transcription upon

recruitment by YY1 to YY1-activated genes, where it acts as an essential coactivator. Involved in UV-damage excision DNA repair. The contribution to DNA double-strand break repair appears to be largely indirect through transcriptional regulation. Involved in DNA replication.

Required for microtubule assembly during mitosis thereby regulating chromosome

segregation cycle.[UniProtKB/Swiss-Prot Function]
