

Product datasheet for MR211774

Ninl (NM_207204) Mouse Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Ninl (NM_207204) Mouse Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	Ninl
Synonyms:	4930519N13Rik; Gm1004; Gm1634; mKIAA0980
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
ORF Nucleotide Sequence:	>MR211774 representing NM_207204 Red=Cloning site Blue=ORF Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Chromatograms: https://cdn.origene.com/chromatograms/mm9096_h06.zip

Restriction Sites: SgfI-MluI

Cloning Scheme:

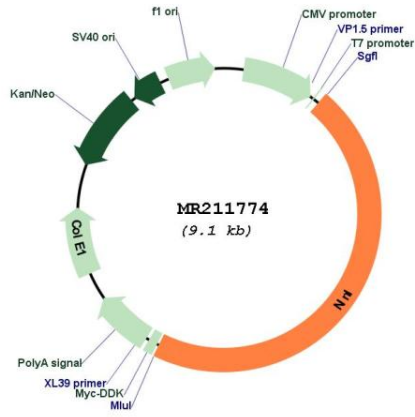

* The last codon before the Stop codon of the ORF

ACCN: NM_207204

ORF Size: 4182 bp

OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none"> 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_207204.2 , NP_997087.2
RefSeq Size:	5104 bp
RefSeq ORF:	4185 bp
Locus ID:	78177
UniProt ID:	Q6ZQ12
Cytogenetics:	2 G3
MW:	157.8 kDa
Gene Summary:	Involved in the microtubule organization in interphase cells. Overexpression induces the fragmentation of the Golgi, and causes lysosomes to disperse toward the cell periphery; it also interferes with mitotic spindle assembly (By similarity).[UniProtKB/Swiss-Prot Function]
