

# Product datasheet for MR215739L3

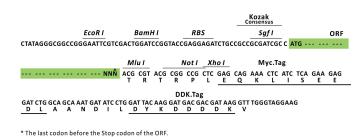

# Pcgf2 (NM\_009545) Mouse Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	Pcgf2 (NM_009545) Mouse Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	Pcgf2
Synonyms:	mel-18; Mel18; Rnf110; Zfp144
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(MR215739).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GC         ATG // NNÑ         ACG CGT

ACCN: ORF Size: NM\_009545 1029 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Pcgf2 (NM_009545) Mouse Tagged Lenti ORF Clone - MR215739L3	
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 009545.2, NP 033571.1</u>
RefSeq Size:	2752 bp
RefSeq ORF:	1029 bp
Locus ID:	22658
UniProt ID:	<u>P23798</u>
Cytogenetics:	11 61.06 cM
Gene Summary:	<ul> <li>Transcriptional repressor (PubMed:8521824). Binds specifically to the DNA sequence 5'-</li> <li>GACTNGACT-3' (PubMed:8521824). Has tumor suppressor activity (PubMed:8521824). May</li> <li>play a role in control of cell proliferation and/or neural cell development (Probable). Regulates</li> <li>proliferation of early T progenitor cells by maintaining expression of</li> <li>HES1(PubMed:15728456). Also plays a role in antero-posterior specification of the axial</li> <li>skeleton and negative regulation of the self-renewal activity of hematopoietic stem cells</li> <li>(PubMed:8625838, PubMed:15183898). Component of a Polycomb group (PcG) multiprotein</li> <li>PRC1-like complex, a complex class required to maintain the transcriptionally repressive state</li> <li>of many genes, including Hox genes, throughout development. PcG PRC1 complex acts via</li> <li>chromatin remodeling and modification of histones; it mediates monoubiquitination of</li> <li>histone H2A 'Lys-119', rendering chromatin heritably changed in its expressibility. Within the</li> <li>PRC1-like complex, regulates RNF2 ubiquitin ligase activity (By similarity).[UniProtKB/Swiss-Prot Function]</li> </ul>
