## Product datasheet for MR216063L3V

## Sh3pxd2a (NM\_001164717) Mouse Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	Sh3pxd2a (NM_001164717) Mouse Tagged ORF Clone Lentiviral Particle
Symbol:	Sh3pxd2a
Synonyms:	2310014D11Rik; AA589508; Al256723; Al413738; C230050L11; EG329070; Fish; Gm5098; Sh3md1
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	NM_001164717
ORF Size:	3288 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(MR216063).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Disclaimer: OTI Annotation:	reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing
	reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression
OTI Annotation:	reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
OTI Annotation: RefSeq:	reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. <u>NM 001164717.1, NP 001158189.1</u>
OTI Annotation: RefSeq: RefSeq Size:	reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. Gene Summary:Adapter protein involved in invadopodia and podosome formation, extracellular matrix<br/>degradation and invasiveness of some cancer cells. Binds matrix metalloproteinases<br/>(ADAMs), NADPH oxidases (NOXs) and phosphoinositides. Acts as an organizer protein that<br/>allows NOX1- or NOX3-dependent reactive oxygen species (ROS) generation and ROS<br/>localization. In association with ADAM12, mediates the neurotoxic effect of amyloid-beta<br/>peptide (By similarity).[UniProtKB/Swiss-Prot Function]
