OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

Gene Summary:This gene encodes a SUMO deconjugating enzyme of the Sentrin/SUMO-specific protease
(SENP) family. The encoded protein is a protease that exhibits deSUMOylating activity
towards proteins involved in chromatin remodeling and promotes chromatin relaxation for
DNA repair or transcription. Alternative splicing of this gene results in multiple transcript
variants. [provided by RefSeq, Jan 2015]
