

## Product datasheet for **MR219050L4V**

### Spata5 (NM\_001163511) Mouse Tagged ORF Clone Lentiviral Particle

#### Product data:

|                                  |                                   |
|----------------------------------|-----------------------------------|
| <b>Product Type:</b>             | Lentiviral Particles              |
| <b>Symbol:</b>                   | Spata5                            |
| <b>Synonyms:</b>                 | 2510048F20Rik; C78064; Spaf       |
| <b>Mammalian Cell Selection:</b> | Puromycin                         |
| <b>Vector:</b>                   | pLenti-C-mGFP-P2A-Puro (PS100093) |
| <b>Tag:</b>                      | mGFP                              |
| <b>ACCN:</b>                     | NM_001163511                      |
| <b>ORF Size:</b>                 | 2679 bp                           |

**ORF Nucleotide Sequence:** The ORF insert of this clone is exactly the same as(MR219050).

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

|                      |                                                                 |
|----------------------|-----------------------------------------------------------------|
| <b>RefSeq:</b>       | <a href="#">NM_001163511.2</a> , <a href="#">NP_001156983.1</a> |
| <b>RefSeq Size:</b>  | 3258 bp                                                         |
| <b>RefSeq ORF:</b>   | 2682 bp                                                         |
| <b>Locus ID:</b>     | 57815                                                           |
| <b>UniProt ID:</b>   | <a href="#">Q3UMC0</a>                                          |
| <b>Cytogenetics:</b> | 3 B                                                             |

**Gene Summary:**

ATP-dependent chaperone which uses the energy provided by ATP hydrolysis to generate mechanical force to disassemble protein complexes (By similarity). May be involved in morphological and functional mitochondrial transformations during spermatogenesis (PubMed:10734318).[UniProtKB/Swiss-Prot Function]
