

Product datasheet for MR219424

Dynll1 (NM 019682) Mouse Tagged ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Dynll1 (NM_019682) Mouse Tagged ORF Clone

Tag: Myc-DDK
Symbol: Dynll1

Symbol: Dynll1

Synonyms: Dlc8; Dnclc1; Pin

Mammalian Cell

Selection:

Vector:

pCMV6-Entry (PS100001)

E. coli Selection: Kanamycin (25 ug/mL)

ORF Nucleotide >MR219424 representing NM_019682

Neomycin

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_019682

ORF Size: 267 bp

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts

of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at customercom or by

calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: NM 019682.4, NP 062656.3

RefSeq Size:2037 bpRefSeq ORF:270 bpLocus ID:56455

UniProt ID: P63168

Cytogenetics: 5 F

MW: 10.8 kDa

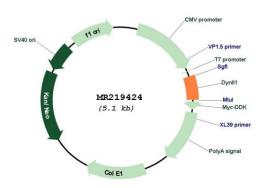

Gene Summary: Acts as one of several non-catalytic accessory components of the cytoplasmic dynein 1

complex that are thought to be involved in linking dynein to cargos and to adapter proteins that regulate dynein function. Cytoplasmic dynein 1 acts as a motor for the intracellular retrograde motility of vesicles and organelles along microtubules. May play a role in changing

or maintaining the spatial distribution of cytoskeletal structures (By similarity).

[UniProtKB/Swiss-Prot Function]
