

## Product datasheet for **MR219880L3V**

### Cenpu (NM\_027973) Mouse Tagged ORF Clone Lentiviral Particle

#### Product data:

|                           |  |
|---------------------------|--|
| Product Type:             | Lentiviral Particles   |
| Product Name:             | Cenpu (NM_027973) Mouse Tagged ORF Clone Lentiviral Particle   |
| Symbol:                   | Cenpu  |
| Synonyms:                 | 1700029A22Rik; Mlf1ip  |
| Mammalian Cell Selection: | Puromycin  |
| Vector:                   | pLenti-C-Myc-DDK-P2A-Puro (PS100092)   |
| Tag:                      | Myc-DDK  |
| ACCN:                     | NM_027973  |
| ORF Size:                 | 1230 bp  |
| ORF Nucleotide Sequence:  | The ORF insert of this clone is exactly the same as(MR219880).   |
| OTI Disclaimer:           | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <a href="#">More info</a> |
| OTI Annotation:           | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| RefSeq:                   | <a href="#">NM_027973.3</a>  |
| RefSeq Size:              | 2467 bp  |
| RefSeq ORF:               | 1233 bp  |
| Locus ID:                 | 71876  |
| UniProt ID:               | <a href="#">Q8C4M7</a>   |
| Cytogenetics:             | 8 B1.1   |

**Gene Summary:**

Component of the CENPA-NAC (nucleosome-associated) complex, a complex that plays a central role in assembly of kinetochore proteins, mitotic progression and chromosome segregation. The CENPA-NAC complex recruits the CENPA-CAD (nucleosome distal) complex and may be involved in incorporation of newly synthesized CENPA into centromeres. Plays an important role in the correct PLK1 localization to the mitotic kinetochores. A scaffold protein responsible for the initial recruitment and maintenance of the kinetochore PLK1 population until its degradation. Involved in transcriptional repression (By similarity).[UniProtKB/Swiss-Prot Function]
