

## **Product datasheet for MR222306L3**

## Derl3 (NM\_024440) Mouse Tagged Lenti ORF Clone

### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Derl3 (NM\_024440) Mouse Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Derl3

**Synonyms:** 1810006I20Rik; 1810063P04Rik; derlin-3; IZP6

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR222306).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

 $<sup>\</sup>ensuremath{^*}$  The last codon before the Stop codon of the ORF.

**ACCN:** NM\_024440

ORF Size: 687 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### Derl3 (NM\_024440) Mouse Tagged Lenti ORF Clone - MR222306L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** NM 024440.2, NP 077760.1

 RefSeq Size:
 1336 bp

 RefSeq ORF:
 687 bp

 Locus ID:
 70377

 UniProt ID:
 Q9D8K3

Cytogenetics: 10 C1

**Gene Summary:** 

misfolded lumenal glycoproteins, but not that of misfolded nonglycoproteins. May act by forming a channel that allows the retrotranslocation of misfolded glycoproteins into the cytosol where they are ubiquitinated and degraded by the proteasome. May mediate the interaction between VCP and the misfolded glycoproteins. May be involved in endoplasmic

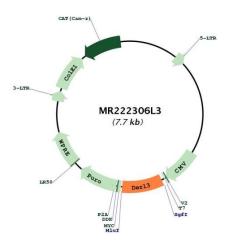

reticulum stress-induced pre-emptive quality control, a mechanism that selectively attenuates the translocation of newly synthesized proteins into the endoplasmic reticulum and reroutes

them to the cytosol for proteasomal degradation.[UniProtKB/Swiss-Prot Function]

Functional component of endoplasmic reticulum-associated degradation (ERAD) for
