

## **Product datasheet for MR222531**

## Crem (NM\_013498) Mouse Tagged ORF Clone

## **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Crem (NM\_013498) Mouse Tagged ORF Clone

Tag: Myc-DDK

Symbol: Crem

Synonyms: IC; ICER; ICERI

Mammalian Cell Neomycin

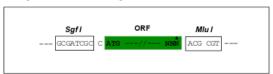

Selection:

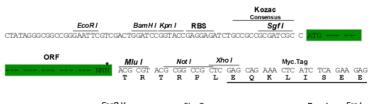

Vector:pCMV6-Entry (PS100001)E. coli Selection:Kanamycin (25 ug/mL)

Restriction Sites: Sgfl-Mlul

**Cloning Scheme:** 

Cloning sites used for ORF Shuttling:

GAT CTG GCA GCA ANT GAT ATC CTG GAT TAC AGG GAT GAC GAC GAT AAG GTT TAA AACGGCCGGCCC

D L A A N D I L L D Y K D D D D K V stop

**ACCN:** NM\_013498

ORF Size: 735 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

<sup>\*</sup> The last codon before the Stop codon of the ORF

ORÏGENE

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 013498.3, NP 038526.2</u>

 RefSeq Size:
 2650 bp

 RefSeq ORF:
 738 bp

 Locus ID:
 12916

 UniProt ID:
 P27699

Cytogenetics: 18 A1

**MW:** 27.9 kDa

**Gene Summary:** This gene encodes a basic-leucine zipper domain-containing protein that localizes to gene

promoters, where it binds to the cyclic AMP response element (CRE). Different protein isoforms encoded by this gene may function as either activators or repressors of

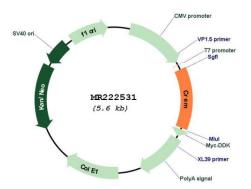

transcription. Activity of this gene is important in multiple developmental processes, including

spermatogenesis. Mutation of this gene causes male infertility. Alternative splicing and promoter usage result in multiple transcript variants for this gene. [provided by RefSeq, Oct

2012]
