

Product datasheet for MR223626L4V

Igf2 (NM_010514) Mouse Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles Product Name: Igf2 (NM_010514) Mouse Tagged ORF Clone Lentiviral Particle Symbol: lgf2 Synonyms: AL033362; lgf; lgf-; lgf-2; lgf-II; M; M6; M6pr; Mpr; Peg; Peg2 **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-mGFP-P2A-Puro (PS100093) mGFP Tag: NM 010514 ACCN: ORF Size: 573 bp The ORF insert of this clone is exactly the same as(MR223626). **ORF** Nucleotide Sequence: The molecular sequence of this clone aligns with the gene accession number as a point of **OTI Disclaimer:** reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info **OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. **RefSeq:** NM 010514.3, NP 034644.2 **RefSeq Size:** 4038 bp **RefSeq ORF:** 576 bp Locus ID: 16002 **UniProt ID:** P09535 Cytogenetics: 7 87.99 cM

Gene Summary:This gene encodes a member of the insulin-like growth factor (IGF) family of proteins that
promote growth and development during fetal and postnatal life. It is an imprinted gene that
is expressed only from the paternal allele. The encoded protein undergoes proteolytic
processing to generate a mature peptide. The transgenic overexpression of this gene in mice
results in prenatal overgrowth, polyhydramnios, fetal and neonatal lethality, disproportionate
organ overgrowth including tongue enlargement, and skeletal abnormalities. Mice lacking the
encoded protein exhibit growth deficiency. Alternative splicing results in multiple transcript
variants encoding different isoforms that may undergo similar processing to generate mature
protein. [provided by RefSeq, Oct 2015]
