## Product datasheet for MR224446L4V

## Itga7 (NM\_008398) Mouse Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                              | Lentiviral Particles   |
|--|--|
| Product Name:                              | ltga7 (NM_008398) Mouse Tagged ORF Clone Lentiviral Particle   |
| Symbol:                                    | ltga7  |
| Synonyms:                                  | al; alpha7; [a]; [a]7  |
| Mammalian Cell<br>Selection:               | Puromycin  |
| Vector:                                    | pLenti-C-mGFP-P2A-Puro (PS100093)  |
| Tag:                                       | mGFP   |
| ACCN:                                      | NM_008398  |
| ORF Size:                                  | 3408 bp  |
| ORF Nucleotide<br>Sequence:                | The ORF insert of this clone is exactly the same as(MR224446).   |
| OTI Disclaimer:                            | The molecular sequence of this clone aligns with the gene accession number as a point of   |
| Off Disclaimer.                            | reference only. However, individual transcript sequences of the same gene can differ through<br>naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This<br>clone is substantially in agreement with the reference, but a complete review of all prevailing<br>variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:                            | reference only. However, individual transcript sequences of the same gene can differ through<br>naturally occurring variations (e.g. polymorphisms), each with its own valid existence. Gene Summary: This gene encodes a member of the integrin family of cell surface proteins that mediate cellular interactions with the extracellular matrix and other cells. The encoded transmembrane protein is the alpha subunit that forms a noncovalent heterodimer with the beta subunit to form the functional integrin receptor that binds to laminin. Mice lacking the encoded protein exhibit symptoms of progressive muscular dystrophy, impaired axonal regeneration and cerebral vascular defects. [provided by RefSeq, Aug 2016]
