

Product datasheet for MR225132L4

Crkl (NM_007764) Mouse Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Crkl (NM_007764) Mouse Tagged Lenti ORF Clone

Tag: mGFP Symbol: Crkl

Synonyms: 1110025F07Rik; AA589403; Al325100; Cr; Crkol; snoop

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR225132).

Sequence:

icicolide and a second a second and a second a second and a second a second a second a second a second and a

Restriction Sites:

n Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_007764

ORF Size: 912 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Crkl (NM_007764) Mouse Tagged Lenti ORF Clone - MR225132L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 007764.4</u>, <u>NP 031790.2</u>

 RefSeq Size:
 5050 bp

 RefSeq ORF:
 912 bp

 Locus ID:
 12929

 UniProt ID:
 P47941

 Cytogenetics:
 16 A3

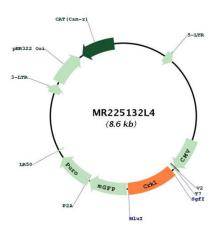

Gene Summary: This gene is part of a family of adapter proteins that mediate formation of signal transduction

complexes in response to extracellular stimuli, such as growth and differentiation factors. Protein-protein interactions occur through the SH2 domain, which binds phosphorylated tyrosine residues, and the SH3 domain, which binds proline-rich peptide motifs. These interactions promote recruitment and activation of effector proteins to regulate cell migration, adhesion, and proliferation. In certain mouse genetic backgrounds this protein is essential for embryonic development. It is important for neural crest cell differentiation and survival and is proposed to play an important role in transducing the oncogenic signal of Bcr/Abl. Deletion of this gene in mouse mimics the phenotype of DiGeorge/velocardiofacial syndrome in human. Alternative splicing results in multiple transcript variants that encode

different protein isoforms. [provided by RefSeq, Mar 2013]
