## Product datasheet for MR225199L3V

## Mamdc4 (NM\_001081199) Mouse Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                          | Lentiviral Particles  |
|--|---|
| Product Name:                          | Mamdc4 (NM_001081199) Mouse Tagged ORF Clone Lentiviral Particle  |
| Symbol:                                | Mamdc4  |
| Synonyms:                              | Gm995   |
| Mammalian Cell<br>Selection:           | Puromycin   |
| Vector:                                | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| Tag:                                   | Myc-DDK   |
| ACCN:                                  | NM_001081199  |
| ORF Size:                              | 3696 bp   |
| ORF Nucleotide<br>Sequence:            | The ORF insert of this clone is exactly the same as(MR225199).  |
| OTI Disclaimer:                        | The molecular sequence of this clone aligns with the gene accession number as a point of  |
|  | reference only. However, individual transcript sequences of the same gene can differ through<br>naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This<br>clone is substantially in agreement with the reference, but a complete review of all prevailing<br>variants is recommended prior to use. <u>More info</u>   |
| OTI Annotation:                        | naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing  |
| OTI Annotation:<br>RefSeq:             | naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u><br>This clone was engineered to express the complete ORF with an expression tag. Expression   |
|  | naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u><br>This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
