

Product datasheet for MR226869L3V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Areg (NM_009704) Mouse Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Areg (NM_009704) Mouse Tagged ORF Clone Lentiviral Particle

Symbol: Areg

Synonyms: AR; Mcub; Sdg; Sdgf

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK
ACCN: NM 009704

ORF Size: 744 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(MR226869).

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements.

Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA.

Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence

verification at a reduced cost. Please contact our customer care team at

<u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 009704.3

RefSeq Size: 1199 bp RefSeq ORF: 747 bp

Areg (NM_009704) Mouse Tagged ORF Clone Lentiviral Particle - MR226869L3V

Locus ID: 11839

 UniProt ID:
 P31955

 Cytogenetics:
 5 44.78 cM

Gene Summary: This gene encodes a member of the epidermal growth factor (EGF) family and preproprotein

that is proteolytically processed to generate a mature protein product. The encoded protein is a ligand of the epidermal growth factor receptor (EGFR) and has been shown to play a role in immunity, inflammation, tissue repair, and lung and mammary gland development. Homozygous knockout mice for this gene exhibit impaired immune system regulation in the

skin and gene expression changes characteristic of chronic liver damage. [provided by

RefSeq, Aug 2015]
