

Product datasheet for MR227030L4

Cck (NM_031161) Mouse Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Pla	smids				
Product Name:	Cck (NM_031161) Mouse Tagged Lenti ORF Clone					
Tag:	mGFP					
Symbol:	Cck					
Mammalian Cell Selection:	Puromycin					
Vector:	pLenti-C-mGFP	-P2A-P	uro (PS10	0093)		
E. coli Selection:	Chloramphenicol (34 ug/mL)					
ORF Nucleotide Sequence:	The ORF insert	c of th	is clone	is exac	tly the sa	ame as(MR227030).
Restriction Sites:	Sgfl-Mlul					
Cloning Scheme:			ses used for ORF Sh Sgf I GCG ATC GC ATC	ORF		
		EcoR I	BamH I	RBS	Kozak Consensus Sgf I	ORF
	CTATAGGGCGGCCG	GGAATTCGTC	GACTGGATCCGGT	ACCGAGGAGATCI	GCCGCCGCGATCGC	C ATG

	(NM_031161) Mouse Tagged Lenti ORF Clone – MR227030L4
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Metho	 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 031161.3</u>
RefSeq Size:	702 bp
RefSeq ORF:	348 bp
Locus ID:	12424
UniProt ID:	<u>P09240</u>
Cytogenetics:	9 F4
Gene Summary:	This gene encodes a member of the gastrin/cholecystokinin family of proteins. The encoded preproprotein is proteolytically processed to generate multiple protein products, including the peptide hormones cholecystokinin-8, -12, -33, and others. The encoded peptides have been shown to regulate gastric acid secretion and food intake. A sulfated form of cholecystokinin-8 may modulate neuronal activity in the brain. Homozygous knockout mice for this gene exhibit impaired insulin secretion, enhanced insulin sensitivity, and resistance to obesity. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Nov
