# Product datasheet for MR227099L3V

## Trpa1 (NM\_177781) Mouse Tagged ORF Clone Lentiviral Particle

### **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | Trpa1 (NM_177781) Mouse Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | Trpa1   |
| Synonyms:                    | Anktm1; TRPA1b  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_177781   |
| ORF Size:                    | 3378 bp   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(MR227099).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 177781.4</u>  |
| RefSeq Size:                 | 4263 bp   |
| RefSeq ORF:                  | 3378 bp   |
| Locus ID:                    | 277328  |
| UniProt ID:                  | <u>Q8BLA8</u>   |
| Cytogenetics:                | 1 A3  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# Image: CRICENETrpa1 (NM\_177781) Mouse Tagged ORF Clone Lentiviral Particle - MR227099L3VGene Summary:Receptor-activated non-selective cation channel involved in detection of pain and possibly<br/>also in cold perception and inner ear function. Has a central role in the pain response to<br/>endogenous inflammatory mediators and to a diverse array of volatile irritants, such as<br/>mustard oil, cinnamaldehyde, garlic and acrolein, an irritant from tears gas and vehicule<br/>exhaust fumes. Acts also as an ionotropic cannabinoid receptor by being activated by<br/>delta(9)-tetrahydrocannabinol (THC), the psychoactive component of marijuana. Is also<br/>activated by menthol (in vitro) (By similarity). May be a component for the mechanosensitive<br/>transduction channel of hair cells in inner ear, thereby participating in the perception of

[UniProtKB/Swiss-Prot Function]

sounds. Probably operated by a phosphatidylinositol second messenger system.
