Cytogenetics: 9p13.3

**Summary:** This gene encodes a protein that appears to belong to a family of evolutionarily related proteins (DUF78), that may share one or more domains in common. Members of this family are small archaeobacterial proteins with no known function. Alternative splicing has been observed at this locus and two variants, both encoding the same protein, have been identified. [provided by RefSeq, Jul 2008]

**Product images:**

Coomassie blue staining of purified RPP25L protein (Cat# [TP305700]). The protein was produced from HEK293T cells transfected with RPP25L cDNA clone (Cat# [RC205700]) using MegaTran 2.0 (Cat# [TT210002]).
