Product datasheet for PP014P1

II9 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, FN, WB
Recommended Dilution:	 <u>Neutralization:</u> To yield one-half maximal inhibition [ND50] of the biological activity of mIL-9 (0.30 ng/ml), a concentration of 0.006-0.012 µg/ml of this antibody is required. <u>ELISA:</u> To detect mIL-9 by direct ELISA (using 100 µl/well antibody solution) a concentration of at least 0.5 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with compatible secondary reagents, allows the detection of 0.2-0.4 ng/well of recombinant mIL-9. <u>Western Blot:</u> To detect mIL-9 by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant mIL-9 is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Highly pure (>98%) recombinant mIL-9
Specificity:	Recognises Murine IL-9
Formulation:	PBS, pH 7.2 without preservatives. State: Aff - Purified State: Lyophilized purified lg fraction.
Reconstitution Method:	Restore in sterile water to a concentration of 0.1-1.0 mg/ml.
Purification:	Affinity chromatography.
Conjugation:	Unconjugated
Storage:	Store the antibody prior to reconstitution at -20°C. Following reconstitution the antibody can be stored at 2-8°C for one month or at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.

	ll9 Rabbit Polyclonal Antibody – PP014P1
Gene Name:	interleukin 9
Database Link:	Entrez Gene 16198 Mouse P15247
Background:	Interleukin 9 (IL9) is a cytokine preferentially produced by T helper type 2 lymphocytes and active on various cell types such as T and B lymphocytes, mast cells and haemopoietic progenitors; but no effect of this cytokine has been reported so far on mononuclear phagocytes. IL9 stimulates cell proliferation and prevents apoptosis. The IL9 receptor (IL 9R) belongs to the haemopoietic receptor superfamily and its signal transduction involves mainly the (JAK/STAT) pathway. Some studies have implicated IL9 as an important cytokine in a number of Th2 cytokine mediated pathologies, in particular asthma.
Synonyms:	IL-9, T-cell growth factor P40, P40 cytokine
Note:	Centrifuge vial prior to opening!
