- Background:** MCP-5 is a member of the b-chemokine family (C-C) of cytokines. This chemokine is strongly chemotactic for human monocytes and murine peritoneal macrophages, but is not active on mouse neutrophils and shows only a weak response on mouse eosinophils at high concentrations.
- Synonyms:** MCP5, CCL-12, C-C motif chemokine 12. Macrophage Chemotactic Protein-5
- Note:** Centrifuge vial prior to opening!
