

## Product datasheet for PP018P1

## **Kitl Rabbit Polyclonal Antibody**

**Product data:** 

**Product Type: Primary Antibodies** 

**Applications:** ELISA, FN, WB Recommended Dilution: Neutralization:

To yield one-half maximal inhibition [ND50] of the biological activity of mSCF (25.0 ng/ml), a

concentration of 0.60-0.65 µg/ml of this antibody is required.

ELISA:

To detect mSCF by direct ELISA (using 100 µl/well antibody solution) a concentration of at least 0.5 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with compatible secondary reagents, allows the detection of 0.2-0.4 ng/well of

recombinant mSCF.

Western Blot:

To detect mSCF by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 μg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant mSCF is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

Reactivity: Mouse Host: Rabbit Clonality: Polyclonal

Immunogen: Highly pure (>98%) recombinant mSCF.

Specificity: This antibody recognises Murine Stem Cell Factor.

Formulation: PBS, pH 7.2 without preservatives.

State: Aff - Purified

State: Lyophilized purified Ig fraction.

**Reconstitution Method:** Restore in sterile water to a concentration of 0.1-1.0 mg/ml.

**Purification:** Affinity chromatography.

Conjugation: Unconjugated

Storage: Store the antibody prior to reconstitution at -20°C. Following reconstitution the antibody can

be stored at 2-8°C for one month or at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.
