

Product datasheet for PP032B2

Cxcl2 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, WB Recommended Dilution: ELISA:

> (Direct): To detect Rat GRO-β/MIP-2 by direct ELISA (using 100 μl/well antibody solution) a concentration of 0.25–1.0 µg/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with compatible secondary reagents, allows the detection of at least

0.2-0.4 ng/well of recombinant Rat GRO-β/MIP-2.

(Sandwich): To detect Rat GRO-β/MIP-2 by sandwich ELISA (using 100 μl/well antibody solution) a concentration of 0.25-1.0 µg/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with Polyclonal Anti-Rat GRO-β/MIP-2 (PP032P1, PP032P2) as a capture antibody, allows the detection of at least 0.2-0.4 ng/well of recombinant Rat

GRO-β/MIP-2. Western Blot:

To detect Rat GRO-β/MIP-2 by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant Rat GRO-B/MIP-2 is 1.5-3.0 ng/lane, under either reducing or

non-reducing conditions.

Reactivity: Rat

Host: Rabbit Clonality: Polyclonal

Immunogen: highly pure (>98%) recombinant rat GRO/b/MIP-2

Specificity: Recognises Rat GRO beta/MIP-2. Formulation: PBS, pH 7.2 without preservatives.

Label: Biotin

State: Lyophilized purified Ig fraction.

Label: conjugated

Reconstitution Method: Restore sterile PBS containing 0.1% BSA to a concentration of 0.1-1.0 mg/ml.

Purification: Affinity chromatography.

Conjugation: Biotin

Cxcl2 Rabbit Polyclonal Antibody - PP032B2

Storage: Store the antibody prior to reconstitution at -20°C. Following reconstitution the antibody can

be stored at 2-8°C for one month or at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.

Gene Name: C-X-C motif chemokine ligand 2

Database Link: Entrez Gene 114105 Rat

P30348

Background: GRO beta is a member of the CXC, or chemokine class. It contains the ELR domain

immediately preceding the first cysteine residue near the amino terminus. Other chemokines in this group include IL8, GRO alpha/beta/gamma, mouse KC, ENA78, GCP2, PBP/CTAPIII/beta TG/NAP2. These chemokines act primarily on neutrophils as chemoattractants and activators, including neutrophil degradation with release of myloperoxidase and other enzymes. GRO

beta was originally identified as a heparin-binding protein secreted from a murine

macrophage cell line in response to endotoxin stimulation. GRO beta is an approximately 8 kDa polypeptide of 73 amino acids. The precursor form of GRO beta consists of 100 amino acids. To generate the mature GRO beta, the precursor cleaves its amino terminal 27 amino acids. GRO beta shows 60% amino acid homology to human GRO alpha and GRO gamma.

Synonyms: C-X-C motif chemokine 2, GRO2, GROB, MIP-2A, SCYB2, Gro-beta, MIP2-alpha

Note: Centrifuge vial prior to opening!
