## **Ccl3 Rabbit Polyclonal Antibody**

**Product data:** 

**Product Type:** Primary Antibodies

**Applications:** ELISA, WB

**Recommended Dilution: ELISA:** To detect rat MIP-1-alpha by direct ELISA (using 100 µl/well antibody solution) this

antibody can be used at a concentration of 0.15-0.30 µg/ml. Used in conjunction with

compatible secondary reagents, allows the detection of at least 0.2 ng/well of recombinant rat

MIP-1-alpha.

**Western Blot:** To detect rat MIP-1-alpha by Western Blot analysis this antibody can be used at a concentration of 0.1- $0.2 \,\mu g/ml$ . Used in conjunction with compatible secondary reagents the detection limit for recombinant rat MIP-1-alpha is  $1.5 - 3.0 \, ng/lane$ , under either reducing

or non-reducing conditions.

**Reactivity:** Rat

Host: Rabbit
Clonality: Polyclonal

Immunogen: Highly pure (>98%) recombinant Rat MIP-1-alpha (Rat MIP-1-alpha).

**Specificity:** Recognises Rat MIP-1 alpha.

**Formulation:** PBS, pH 7.2 without preservatives

Label: Biotin

State: Lyophilized (Sterile filtered) purified Ig fraction

Label: conjugated

**Reconstitution Method:** Restore in sterile PBS containing 0.1% BSA to a concentration of 0.1-1.0 mg/ml.

**Purification:** Affinity Chromatography employing an immobilized Rat MIP-1-alpha matrix

Conjugation: Biotin

**Storage:** Prior to reconstitution store at 2-8°C.

Following reconstitution store undiluted at 2-8°C for one month

or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** C-C motif chemokine ligand 3

#### Ccl3 Rabbit Polyclonal Antibody - PP038B2

P50229

Background: Macrophage Inflammatory Protein 1 alpha (MIP1 alpha) and MIP1 beta, two closely related

but distinct proteins, were originally co-purified from medium conditioned by a LPS-stimulated murine macrophage cell line. Mature mouse MIP1 alpha shares approximately 77% and 70% amino acid identity with human MIP1 alpha and mouse MIP1 beta, respectively. MIP1 proteins are expressed primarily in T cells, B cells, and monocytes after antigen or mitogen stimulation. Has adhesive effects on lymphocytes. MIP1 alpha can inhibit the proliferation of hematopoietic stem cells in vitro as well as in vivo. A signal transducing receptor, designated the C-C chemokine receptor-1 (C-C CKR-1) with seven transmembrane domains that bind MIP1 alpha, MIP1 beta, MCP1 and RANTES with varying affinities, has been

isolated.

Synonyms: CCL-3, MIP-1-alpha, C-C motif chemokine 3, MIP1A, Small-inducible cytokine A3, SCYA3, LD78

alpha, G0S19-1 protein

**Note:** Centrifuge vial prior to opening!
