

Product datasheet for **PP1070B2**

TGF alpha (TGFA) Rabbit Polyclonal Antibody

Product data:

| | |
|------------------------|---|
| Product Type: | Primary Antibodies |
| Applications: | ELISA, WB |
| Recommended Dilution: | ELISA: Direct: To detect hTGF- α (using 100 μ l/well antibody solution) a concentration of 0.25 - 1.0 μ g/ml of this antibody is required. In conjunction with compatible secondary reagents, it allows the detection of at least 0.2 - 0.4 ng/well of recombinant hTGF- α . Sandwich: To detect hTGF- α (using 100 μ l/well antibody solution) a concentration of 0.25 - 1.0 μ g/ml of this antibody is required. In conjunction with Polyclonal Anti-Human TGF- α as a capture antibody, it allows the detection of at least 0.2 - 0.4 ng/well of recombinant hTGF- α . Western blot: To detect hTGF- α this antibody can be used at a concentration of 0.1 - 0.2 μ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hTGF- α is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions. |
| Reactivity: | Human |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Immunogen: | Highly pure (> 98 %) recombinant human TGF- α |
| Specificity: | This antibody detects TGF- α . |
| Formulation: | PBS, pH 7.2 Label: Biotin State: Sterile filtered lyophilized Ig fraction |
| Reconstitution Method: | Centrifuge vial prior to opening. Restore in sterile PBS containing 0.1 % BSA to a concentration of 0.1 - 1.0 mg/ml. |
| Purification: | Affinity chromatography |
| Conjugation: | Biotin |
| Storage: | Store the lyophilized antibody at -20 °C. Following reconstitution it is stable for two weeks at 2 - 8 °C. Frozen aliquots are stable for 6 months when stored at -20 °C. Avoid repeated freezing and thawing. |
| Stability: | Shelf life: One year from despatch. |
