Il12a (alpha + beta) Goat Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, WB

Recommended Dilution: ELISA: Direct: To detect mIL-12 (using 100 μl/well antibody solution) a concentration of

0.25 - $1.0~\mu g/ml$ of this antibody is required. In conjunction with compatible secondary reagents, it allows the detection of at least 0.2 - 0.4~ng/well of recombinant mIL-12. Sandwich: To detect mIL-12 (using 100 $\mu l/well$ antibody solution) a concentration of

0.25 - $1.0~\mu g/ml$ of this antibody is required. In conjunction with Polyclonal Anti-Murine IL-12 as a capture antibody, it allows the detection of at least 0.2 - 0.4~ng/well of recombinant mIL-

12.

Western blot: To detect mIL-12 this antibody can be used at a concentration of

0.1 - $0.2~\mu g/ml$. Used in conjunction with compatible secondary reagents the detection limit

for recombinant mIL-12 is 1.5 - 3.0 ng/lane, under either reducing or non-reducing

conditions.

Reactivity: Mouse

Host: Goat

Clonality: Polyclonal

Immunogen: Highly pure (> 98 %) recombinant murine IL-12

Specificity: This antibody detects Interleukin-12.

Formulation: PBS, pH 7.2

Label: Biotin

State: Sterile filtered lyophilized Ig fraction

Reconstitution Method: Centrifuge vial prior to opening. Restore in sterile PBS containing 0.1 % BSA to a

concentration of 0.1 -1.0 mg/ml.

Purification: Affinity chromatography

Conjugation: Biotin

Storage: Store the lyophilized antibody at -20 °C. Following reconstitution it is stable for two weeks at

2 - 8 °C. Frozen aliquots are stable for 6 months when stored at -20 °C. Avoid repeated

freezing and thawing.

Stability: Shelf life: One year from despatch.

Il12a (alpha + beta) Goat Polyclonal Antibody - PP1110B2

Gene Name: interleukin 12a

Database Link: Entrez Gene 16159 Mouse

P43431

Background: Interleukin 12 (IL12) can act as a growth factor for activated T and NK cells, enhance the lytic

activity of NK/lymphokine activated killer cells, and stimulate the production of IFN gamma by resting PBMC. IL12 induces IFN gamma, TNF alpha production in T and NK cells; costimulation of PBL proliferation; proliferation/differentiation of TH1 T lymphocytes. It is downregulated by IL10; homodimeric p40 antagonistic to functional p70 heterodimer. IL12R beta 1 binds p40

but when dimeric with IL12R beta 2 binds p35.

Synonyms: IL-12A, IL-12 subunit p35, NKSF1, CLMF p35
