

Product datasheet for PP1131P1

RANK (TNFRSF11A) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: ELISA, FN, WB **Recommended Dilution:** Neutralization. ELISA: To detect hsRankR by direct ELISA (using 100µl/well antibody solution) a concentration of at least 0.5 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with compatible secondary reagents, allows the detection of 0.2-0.4 ng/well of recombinant hsRankR. Western Blot: To detect hsRankR by Western Blot analysis this antibody can be used at a concentration of 0.1- 0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hsRankR is 1.5-3.0 ng/lane, under either reducing or nonreducing conditions. **Reactivity:** Human Host: Rabbit **Clonality:** Polyclonal Immunogen: Highly pure (>98%) recombinant hsRank Receptor Specificity: This antibody reacts with sRank Receptor. Formulation: PBS, pH 7.2 without preservatives. State: Aff - Purified State: Lyophilized purified Ig fraction. **Reconstitution Method:** Restore in sterile water to a concentration of 0.1-1.0 mg/ml. **Purification:** Affinity chromatography. Unconjugated **Conjugation:** Store the antibody prior to reconstitution at -20°C. Following reconstitution the antibody can Storage: be stored at 2-8°C for one month or at -20°C for longer. Avoid repeated freezing and thawing. Stability: Shelf life: One year from despatch. Gene Name: tumor necrosis factor receptor superfamily member 11a Database Link: Entrez Gene 8792 Human Q9Y6Q6
