OriGene Technologies, Inc.

TNFRSF1B Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, WB

Recommended Dilution: Direct ELISA: To detect hsTNF Receptor II by direct ELISA (using 100 µl/well antibody solution)

this antibody can be used at a concentration of ~1.0 µg/ml. This Biotin conjugated antibody

allows the detection of at least 0.2-0.4 ng/well of recombinant hsTNF Receptor II.

Sandwich ELISA: To detect hsTNF-receptor II by Sandwich ELISA (using 100 μ I/well antibody solution) a concentration of 0.25-1.0 μ g/ml of this antibody is required. This Biotin conjugated antibody, in conjunction with Affinity purified Anti-Human sTNF-receptor II (Cat.-No PP1222P) as a captor antibody, allows the detection of at least 0.2-0.4 μ g/well of recombinant hsTNF-

receptor II.

Western blot: To detect hsTNF Receptor II by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 μ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hsTNF Receptor II is 1.5-3.0 ng/lane, under either reducing

or non-reducing conditions.

Reactivity: Human
Host: Rabbit

Clonality: Polyclonal

Immunogen: Highly purified (>98%) E. coli derived recombinant hsTNF Receptor II (Human soluble Tumor

Necrosis Factor Receptor II).

Specificity: This antibody recognizes Human soluble TNF Receptor II.

Other species not tested.

Formulation: PBS, pH 7.2 without preservatives

Label: Biotin

State: Lyophilized Sterile filtered purified Ig fraction

Label: conjugated

Reconstitution Method: Restore to a concentration of 0.1-1 mg/ml with sterile PBS solution containing 0.1% BSA.

Purification: Affinity Chromatography.

Conjugation: Biotin

TNFRSF1B Rabbit Polyclonal Antibody - PP1222B2

Storage: Store lyophilized at 2-8°C for 6 months or at -20°C long term.

After reconstitution store the antibody undiluted at 2-8°C for one month

or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: tumor necrosis factor receptor superfamily member 1B

Database Link: Entrez Gene 7133 Human

P20333

Background: Tumor Necrosis Factor (TNF) is a cytokine whose function is mediated through two distinct

cell surface receptors (TNF Receptor I and TNF Receptor II) that are included in the TNF receptor superfamily along with FAS antigen and CD40. TNF receptors I and II are membrane glycoproteins and they are from the family of cell surface molecules including nerve growth factor receptor, Fas/Apo1, CD30, OX40, and 4-1BB, which are characterized by cysteine rich

motifs in the extracellular domain.

TNF Receptor II (p75, CD120b) is present on most cell types (including monocytes, endothelial cells, Langerhans cells, and macrophages) and is considered to play a role in cell stimulation

by TNF alpha. TNF Receptor II molecule is shown to be responsible for stimulation of

activated T lymphocytes by TNF alpha.

Synonyms: Tumor necrosis factor receptor 2, p80 TNF-alpha receptor, TNFRSF1B, TNFBR, TNF-R2
