

## **Product datasheet for QP100018**

## SensiFast SYBR Master Mix Lo-ROX (2x)

## **Product data:**

**Product Type:** qPCR Reagents

Components: Ten vials of QP100016S each containing 1.0 mL SensiFAST SYBR Master Mix - Lo-ROX Kit

(sufficient for 1000 rxns) One Datasheet

Quality Control: The SensiFAST SYBR Lo-ROX Kit has been developed for fast, highly accurate real-time PCR

and has been validated on all commonly-used real-time instruments that require a low concentration of the passive reference dye ROX. A combination of the latest advances in buffer chemistry and PCR enhancers ensures that the SensiFAST SYBR Lo-ROX Kit produces reliable assay results under fast thermal cycling conditions. An antibody-mediated hot-start DNA polymerase system promotes highly-specific amplification, in turn improving assay

sensitivity and dynamic range.

Storage: Upon receipt, please store the Master Mix at -20°C.

**Stability:** The Master Mix is stable for six months from date of shipping when stored at -20°C. Avoid

repeated freeze-thaws as this will degrade the product.
