Product datasheet for R1023

RFX5 (N-term) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, EMSA, IP, WB
Recommended Dilution:	Suitable for Immunoprecipitation, Western blotting (1/500-1/3,000), ELISA (1/5,000-1/25,000) and supershift assays. Recommended Dilutions : This product was assayed by immunoblot and found to be reactive against RFX5 (N-terminal specific) from a variety of fibroblast and B-cell lysates at a dilution of 1/500 followed by reaction with Peroxidase conjugated Affinity Purified anti-Rabbit IgG [H&L] (Goat). Anti-RFX5 (N-terminal specific) is suitable for the detection by immunoblot of human RFX5 a shows a 75 kDa band. This product was also tested in a gel supershift assay and found to be reactive against RFX5 complexes using 0.5 to 1.0 µl per assay.
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	RFX5 (N-terminal specific) peptide corresponding to a region near the N-terminus of the human protein conjugated to Keyhole Limpet Hemocyanin (KLH).
Specificity:	Anti-RFX5 (N-terminal specific) may react with unknown minor bands at 85 kDa and 55 kDa. Reacts with human and mouse RFX5 from a variety of fibroblast and B-cell lysates. Recognition is at the N-terminal region. Western blot of RFX5 shows a 75 kDa band. A minor band at 68 kDa may be detected which may represent an RFX5 breakdown product or unmodified RFX5.
Formulation:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 with 0.01% (w/v) Sodium Azide as preservative. State: lg Fraction State: Liquid (sterile filtered) purified lg fraction. Stabilizer: None
Concentration:	lot specific
Purification:	Prepared from monospecific antiserum by delipidation and defibrination.
Conjugation:	Unconjugated

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	RFX5 (N-term) Rabbit Polyclonal Antibody – R1023
Storage:	Store the antibody (undiluted) at 2-8°C for one month or (in aliquots) at -20°C for longer. Dilute only prior to immediate use. Avoid cycles of freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	regulatory factor X5
Database Link:	<u>Entrez Gene 5993 Human</u> <u>P48382</u>
Background:	RFX5 is the regulatory gene responsible for human MHC class II deficiency. Patients with this disease exhibit a characteristic defect in the binding of a nuclear factor, RFX, to the X box motif of MHC class II promoters. RFX5 is the 75 kDa subunit of the RFX complex which is absolutely essential and highly specific for regulating MHC class II gene expression and control of the immune response. RFX5 is a protein consisting of 616 amino acids.
Synonyms:	Regulatory factor X 5
