

Product datasheet for R1148PS

ACHE Goat Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, IP, WB
Recommended Dilution:	ELISA: Start with 1/1,000-1/5,000. This antibody has been assayed against 1.0 µg of acetylcholinesterase [bovine erythrocytes] in a standard sandwich ELISA using peroxidase conjugated affinity purified anti-goat IgG [H&L] (rabbit) and ABTS as a substrate for 30 minutes at room temperature. Western blot: 1/500-1/5,000. Immunoprecipitation.
Reactivity:	Bovine
Host:	Goat
Clonality:	Polyclonal
Immunogen:	Acetylcholinesterase from bovine erythrocytes
Specificity:	This antibody detects bovine acetylcholinesterase. Cross reactivity against acetylcholinesterase from other sources is unknown. Immunoelectrophoresis gives a single precipitin arc against anti-goat serum as well as purified and partially purified acetylcholinesterase [bovine erythrocytes].
Formulation:	0.02 M Potassium phosphate, 0.15 M Sodium chloride, pH 7.2 State: Purified State: Lyophilized purified Ig fraction Preservative: 0.01% Sodium azide
Reconstitution Method:	Restore with 0.1 ml of deionized water (or equivalent)
Concentration:	lot specific
Purification:	Multistep process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2-8°C for 6 months or at -20°C long term. After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Dilute only prior to immediate use. Avoid repeated freezing and thawing.
