Product Type:	Native Proteins
Description:	Streptavidin protein, 1 mg
Protein Source:	S. avidinii
Concentration:	lot specific
Purity:	Prepared from Chromatographically purified streptavidin and labelled with Horseradish Peroxidase (HRP).
Conjugation:	HRP
Buffer:	State: Lyophilized purifed protein. Buffer System: 0.02M Potassium Phosphate, 0.15M Sodium Chloride, pH 7.2 <b>Label</b> : Horseradish Peroxidase (HRP) Preservative: 0.01% (w/v) Gentamicin sulfate Stabilizer: 10 mg/ml BSA (IgG and Protease free) Presentation Label: HRP
<b>Reconstitution Method:</b>	Restore with 1.0 ml of deionized water (or equivalent).
Preparation:	Lyophilized purifed protein.
Applications:	Suitable for Immunoblotting (Western or Dot blot, 1/10,000-1/40,000), ELISA (1/20,000- 1/200,000), Immunoperoxidase Electron Microscopy and Immunohistochemistry (1/1,000- 1/5,000) as well as other peroxidase-biotin-avidin based enzymatic assays.
Note:	Assay by Immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase and anti-Streptavidin. No reaction was observed against anti-Avidin.
	Caution: <b>Do Not</b> Add Sodium Azide
Storage:	<ul> <li>Store vial at 2-8°C prior to restoration.</li> <li>Restore with deionized water (or equivalent); centrifuge product if not completely clear after standing at room temperature. This product is stable for one month at 2-8°C as an undiluted liquid.</li> <li>For extended storage aliquot contents and freeze at -20°C or below. Avoid repeated freezing and thawing.</li> <li>Dilute only prior to immediate use.</li> </ul>
Stability:	Shelf life: one year from despatch.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Streptavidin Protein – RA021HRP
Synonyms:	StAv
Summary:	Streptavidin is a a bacterial protein (from Streptomyces avidinii) that has an exceptionally high binding affinity for biotin (B7). Streptavidin-biotin binding is one of the strongest known non-covalent interactions and is highly resistant to many conditions that would typically cause dissociation (such as organic solvents, denaturants, detergents, and extreme temperatures or pH). Streptavidin's afinity for biotin can be employed in a variety of experimental uses, from purifications to standards, to means of detection or pull down experiments. Horse Raddish Peroxidase (HRP) is an enzyme that utilize organic peroxide compounds as electron donors. Naturally provides protection for plants against pathogens, but can be utilized in molecular biology to convert various substrates to detectable compounds (such as in Western Blotting and ELISAs).
Protein Families	: Suitable for Immunoblotting (Western or Dot blot, 1/10,000-1/40,000), ELISA (1/20,000- 1/200,000), Immunoperoxidase Electron Microscopy and Immunohistochemistry (1/1,000- 1/5,000) as well as other peroxidase-biotin-avidin based enzymatic assays.
