## Product datasheet for RA110B

## Albumin Human Protein

## **Product data:**

Product Type:	Native Proteins
Description:	Albumin human protein, 1 mg
Species:	Human
Protein Source:	Serum
Concentration:	lot specific
Purity:	This product was prepared from normal serum delipidation, a multi-stage process including selective precipitation.
Conjugation:	Biotin
Buffer:	State: Lyophilized purified Ig fraction. Buffer System: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2, containing 10 mg/ml Bovine Serum Albumin (BSA; IgG and Protease free) as stabilizer and 0.01% (w/v) Sodium Azide as preservative. Presentation Label: Biotin
Reconstitution Method:	Restore with 1.0 ml of deionized water (or equivalent).
Preparation:	Lyophilized purified Ig fraction.
Applications:	Immunoblotting, ELISA, immunohistochemistry, Immunomicroscopy as well as other antibody based assays using streptavidin or avidin conjugates. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti- Human Albumin and anti-Human Serum.
Protein Description:	Biotin Conjugated Human Albumin.
Note:	<b>Label</b> : Biotinamidocaproate N-Hydroxysuccinimide Ester (BAC) <b>Biotin/Protein Ratio</b> : 10-20 BAC molecules per Human Albumin molecule.
Storage:	Store (undiluted) at 2-8°C prior to restoration. For extended storage reconstitute product with 50% glycerol instead of water and then aliquot contents and freeze at -20°C or below. Avoid cycles of freezing and thawing.
Stability:	Shelf life: one year from despatch. Centrifuge product if not completely clear after standing at room temperature. Dilute only prior to immediate use.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Albumin Human Protein – RA110B
RefSeq:	<u>NP 000468</u>
Locus ID:	213
Cytogenetics:	4q13.3
Synonyms:	FDAHT; HSA; PRO0883; PRO0903; PRO1341
Summary:	This gene encodes the most abundant protein in human blood. This protein functions in the regulation of blood plasma colloid osmotic pressure and acts as a carrier protein for a wide range of endogenous molecules including hormones, fatty acids, and metabolites, as well as exogenous drugs. Additionally, this protein exhibits an esterase-like activity with broad substrate specificity. The encoded preproprotein is proteolytically processed to generate the mature protein. A peptide derived from this protein, EPI-X4, is an endogenous inhibitor of the CXCR4 chemokine receptor. [provided by RefSeq, Jul 2016]
Protein Families	: Secreted Protein
