	MTFR1L (NM_019557) Human Tagged Lenti ORF Clone – RC200212L3	
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ throun naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevaili variants is recommended prior to use. <u>More info</u>	ugh
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expressior varies depending on the nature of the gene.	n
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of wate
