Neuronatin (NNAT) (NM_005386) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Neuronatin (NNAT) (NM_005386) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: Neuronatin

Synonyms: Peg5

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC200328).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_005386

ORF Size: 243 bp

Neuronatin (NNAT) (NM_005386) Human Tagged Lenti ORF Clone - RC200328L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 005386.2</u>

RefSeq Size: 1338 bp
RefSeq ORF: 246 bp
Locus ID: 4826
UniProt ID: Q16517

Cytogenetics: 20q11.23

Protein Families: Transmembrane

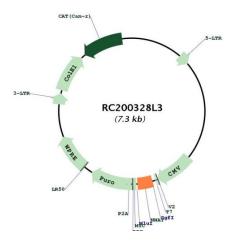

MW: 9.2 kDa

Gene Summary: The protein encoded by this gene is a proteolipid that may be involved in the regulation of ion

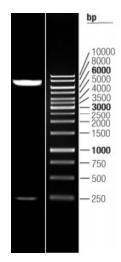

channels during brain development. The encoded protein may also play a role in forming and maintaining the structure of the nervous system. This gene is found within an intron of another gene, bladder cancer associated protein, but on the opposite strand. This gene is imprinted and is expressed only from the paternal allele. [provided by RefSeq, Apr 2016]
