

Product datasheet for RC200349L1V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

SDHA (NM_004168) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: SDHA (NM_004168) Human Tagged ORF Clone Lentiviral Particle

Symbol: SDHA

Synonyms: CMD1GG; FP; MC2DN1; NDAXOA; PGL5; SDH1; SDH2; SDHF

Mammalian Cell

nammanam Cen

Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

 Tag:
 Myc-DDK

 ACCN:
 NM_004168

ORF Size: 1992 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC200349).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 004168.1

 RefSeq Size:
 2803 bp

 RefSeq ORF:
 1995 bp

 Locus ID:
 6389

 UniProt ID:
 P31040

 Cytogenetics:
 5p15.33

Domains: FAD_binding_2, succ_DH_flav_C

Protein Families: Druggable Genome

SDHA (NM_004168) Human Tagged ORF Clone Lentiviral Particle - RC200349L1V

Protein Pathways: Alzheimer's disease, Citrate cycle (TCA cycle), Huntington's disease, Metabolic pathways,

Oxidative phosphorylation, Parkinson's disease

MW: 72.7 kDa

Gene Summary: This gene encodes a major catalytic subunit of succinate-ubiquinone oxidoreductase, a

complex of the mitochondrial respiratory chain. The complex is composed of four nuclearencoded subunits and is localized in the mitochondrial inner membrane. Mutations in this gene have been associated with a form of mitochondrial respiratory chain deficiency known as Leigh Syndrome. A pseudogene has been identified on chromosome 3q29. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
