Product datasheet for **RC200365L4V**

**FARSLA (FARSA) (NM_004461) Human Tagged ORF Clone Lentiviral Particle**

**Product data:**

- **Product Type:** Lentiviral Particles
- **Product Name:** FARSLA (FARSA) (NM_004461) Human Tagged ORF Clone Lentiviral Particle
- **Symbol:** FARSA
- **Synonyms:** CML33; FARSL; FARSLA; FRSA; PheHA
- **Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)
- **ACCN:** NM_004461
- **ORF Size:** 1524 bp
- **ORF Nucleotide Sequence:** The ORF insert of this clone is exactly the same as (RC200365).
- **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info]
- **OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
- **RefSeq:** NM_004461.2, NP_004452.1
- **RefSeq Size:** 1853 bp
- **RefSeq ORF:** 1527 bp
- **Locus ID:** 2193
- **Cytogenetics:** 19p13.13
- **Domains:** tRNA-synt_2d
- **Protein Pathways:** Aminoaclyl-tRNA biosynthesis
- **MW:** 57.6 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use.
Aminoacyl-tRNA synthetases are a class of enzymes that charge tRNAs with their cognate amino acids. This gene encodes a product which is similar to the catalytic subunit of prokaryotic and Saccharomyces cerevisiae phenylalanyl-tRNA synthetases (PheRS). This gene product has been shown to be expressed in a tumor-selective and cell cycle stage- and differentiation-dependent manner, the first member of the tRNA synthetase gene family shown to exhibit this type of regulated expression [provided by RefSeq, Jul 2008].
