## BAP1 (NM\_004656) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type: Lentiviral Particles

**Product Name:** BAP1 (NM\_004656) Human Tagged ORF Clone Lentiviral Particle

Symbol: BAP

**Synonyms:** hucep-6; HUCEP-13; UCHL2

Mammalian Cell

Selection:

None

**Vector:** pLenti-C-mGFP (PS100071)

Tag: mGFP

**ACCN:** NM\_004656 **ORF Size:** 2187 bp

**ORF Nucleotide** 

- - -

Sequence:

The ORF insert of this clone is exactly the same as(RC200378).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally accurring variations (e.g. polymorphisms), each with its own valid existence. This

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 004656.2

 RefSeq Size:
 3717 bp

 RefSeq ORF:
 2190 bp

 Locus ID:
 8314

 UniProt ID:
 Q92560

 Cytogenetics:
 3p21.1

**Domains:** Peptidase\_C12

**Protein Families:** Druggable Genome, Protease

ORIGENE

**MW:** 80.4 kDa

**Gene Summary:** 

This gene belongs to the ubiquitin C-terminal hydrolase subfamily of deubiquitinating enzymes that are involved in the removal of ubiquitin from proteins. The encoded enzyme binds to the breast cancer type 1 susceptibility protein (BRCA1) via the RING finger domain of the latter and acts as a tumor suppressor. In addition, the enzyme may be involved in regulation of transcription, regulation of cell cycle and growth, response to DNA damage and chromatin dynamics. Germline mutations in this gene may be associated with tumor predisposition syndrome (TPDS), which involves increased risk of cancers including malignant mesothelioma, uveal melanoma and cutaneous melanoma. [provided by RefSeq, May 2013]
