Product datasheet for RC200384L3V

SGT1 (ECD) (NM_007265) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	SGT1 (ECD) (NM_007265) Human Tagged ORF Clone Lentiviral Particle
Symbol:	ECD
Synonyms:	GCR2; HSGT1; SGT1
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	NM_007265
ORF Size:	1932 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC200384).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 007265.1</u>
RefSeq Size:	2280 bp
RefSeq ORF:	1935 bp
Locus ID:	11319
UniProt ID:	<u>095905</u>
Cytogenetics:	10q22.2
Protein Families:	Druggable Genome, Transcription Factors
MW:	72.8 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:Regulator of p53/TP53 stability and function. Inhibits MDM2-mediated degradation of
p53/TP53 possibly by cooperating in part with TXNIP (PubMed:16849563, PubMed:23880345).
May be involved transcriptional regulation. In vitro has intrinsic transactivation activity
enhanced by EP300. May be a transcriptional activator required for the expression of
glycolytic genes (PubMed:19919181, PubMed:9928932). Involved in regulation of cell cycle
progression. Proposed to disrupt Rb-E2F binding leading to transcriptional activation of E2F
proteins (PubMed:19640839). The cell cycle -regulating function may depend on its RUVBL1-
mediated association with the R2TP complex (PubMed:26711270). May play a role in
regulation of pre-mRNA splicing (PubMed:24722212).[UniProtKB/Swiss-Prot Function]
